

Google 360 Our 9 Step Solution for Education

1. Domain Setup & Verification - Setting up a GSuite for Education Application

Establish Organisational Units, Groups and Services by user type

2. Existing Environment Survey - Designing the Migration Plan

Covers LDAP, AD integration, understanding you existing email environments etc.

3. Features Configuration - Agreeing Customisations and User Restrictions

Covers G Suite features like Email, Calendar, Classroom, Chat/Voice, etc.

Mobile support (IMAP/Pop) and user customisations e.g. what a student can access

4. Features Configuration - Chromebook & ChromeOS Setup

Agreeing on customisations, 3rd party apps and bookmarks for users for day one

5. Environment Configuration - Defining the End-user Experience

Choosing authentication methods, application support, and user policies

6. Provisioning and Migration - Implementation and Delivery

Email, Calendar and Contacts migration, full setup of GSuite backend

7. Classroom, Sites & GDrive Setup (e.g. Shared Drives)

8. Technical Support, Documentation & Technical Training

9. Training and CPD - **see Google Chrome Training Modules brochure**

The world of Google in Education, GSuite, is a wonderful one, combining the best tools for creativity, collaborative learning, document creation, file storage and productivity. Supercharge your setup by including Classroom, Forms and Sites to get the most from the ecosystem.
